# SAFETY POLICY

The policy of the Management is to provide a safe workplace for all employees. We are committed to conducting our operations in a way that protects people, property and the environment. We believe all injuries and occupational illnesses can be prevented.

However, the full cooperation of each employee is required to achieve this goal.

It is our goal to provide our customers with an excellent and efficient service that is far superior or to what they might expect other service contractors and to perform this service with a commitment towards safety. We will conduct ourselves with absolute honesty and we will take every possible step to see that we serve the customers' needs.

Working in an industrial environment requires that we pay particular attention to the safety of our employees, other people working around our equipment and us. The management mandated that any employee should stop his work due to unsafe acts and unsafe conditions.

We do not consider any phase of our operations to be more important than Safety.
